

The measure
of all things

Precision and continuity

Ever since its foundation in 1883 Kroeplin have been involved in development and production of handy reliable and precise gauges for the measurement of lengths and thicknesses, especially for the metalworking industry.

Thus the quickest system was created, which was the basis for all further innovations and also for the electronic dial indicators. Experience is the solid foundation for quality.

Careful observation and analysis of the market, flexible realization of requirements, convincing measuring concepts - that is the philosophy that makes Kroeplin successful.

Today like before, for more than 135 years.

The challenges for the future will be to face market changes, global change as well as ever-shorter development times and to use these challenges to ensure the future of the company.

Features

- Certificate of quality
- Reliable repeatability
- Scales are well arranged and easy to read
- Scale interval from 0.005 mm up (mechanical gauges)
- Numerical interval from 0.001 mm up (electronic gauges)
- Tolerance marks easy to read
- All mechanical gauges are also available in inch
- The electronic gauges can be switched over to inch
- Measuring contacts are mainly made of carbide
- Electronic gauges with analog/ digital display for better reading
- Digimatic interface
- USB interface
- U-WAVE interface
- Bluetooth interface
- Ergonomically designed
- Measuring programs and contacts for different applications
- Absolute and relative measurement
- Red/ Green LED for tolerance measurement (electronic gauges)
- Special solutions possible
- Stand holding unit for serial measurement of small parts
- Convincing price for convincing performance

Subject to technical alterations.

Contents

Internal measurement	
Application range up to 60 mm	4–5
Application range up to 120 mm	6–7
Application range exceeding 120 mm	8–9
Internal comparison measurement	10–11
External measurement	
Application range up to 30 mm	12–13
Application range up to 200 mm	14–15
Tube wall measurement	
Application range up to 100 mm	16–17
Measurement of foamed material and foils	
Application range up to 100 mm	18–19
Internal measurement with 3-point contact	20

The first electronic quicktest with μm resolution and induction charging technology!

New design and optimized ergonomics.

- Fast reading
- Storage of measuring results
- Precise measuring results
- Quicktest in smallest design
- Numerical interval 0.001 / 0.002 / 0.005 / 0.01 mm
- Lower weight
- Enhanced analog display for optimum reading:
 - 250° analog display range
 - Long analog indicator
- LiPo battery pack with induction charging technology. Battery change is no longer required!

- Measuring programs for different applications MIN / MAX / HOLD
- Bluetooth interface (up to 8 gauges simultaneously)
- USB, Digimatic and U-Wave® interface
- Compatible to Elias, BOBE, IBR
- Data logger (100 measuring values)
- Protection class IP67
- mm / inch switch

Charging station with power supply 8006-20

Can be connected to any device using Bluetooth.

The established generation of quicktests

electronic

- Protection class IP67
- Interactive keypad
- Digital display with analog bar
- Numerical interval adjustable 0,001 / 0,002 / 0,005 / 0,01 / 0,02 / 0,05 mm
- ergonomically designed
- Interfaces USB, Digimatic or U-Wave® available on request
- Data Logger (100 measuring values)
- Bluetooth interface up to 8 gauges simultaneously
- Battery 2x type AAA

mechanical

- Protection class IP65
- optimized measuring force
- accurate measurement
- ergonomically designed

Internal measurement

Application range up to 60 mm

Accessories

- Wooden boxes for all series
- For order code please see technical details (HK = wooden box is included in delivery)

For measuring small parts the holding unit enables the gauge to be used with a measuring stand.

Gauge L102
(available on request)

Holder CO / GO	order no.: 8004-58
Holder D1 / H1 / D2 / H2	order no.: 8004-50
Holder D4 / H4	order no.: 8004-55
Holder K / L	order no.: 8007-10

Special gauges

We are always searching for the best solution for your measuring problem, either mechanical or electronic.

In order to enable us to find the solution together and to design your special gauge, please kindly send us a drawing of the object to be measured and indicate tolerance and measuring force, and if possible, send us a sample of the part to be measured. Full information in your enquiry enables us to put forward the optimum design solution for your application.

The gauges shown are examples of special applications. For additional measuring applications we offer customised solutions.

► Measurements of undercuts with inclined measuring contacts.

► Measurements of wall thicknesses in hard-to-access places.

► Measurements in hard-to-access places with specially designed caliper arms.

► Measurement of bottle diameters with depth measurement.

► Measurements of foamed materials with flat contacts and reduced measuring force.

► Measurements of wall thicknesses at large undercuts with bayonet-type contacts (displacement in direction of the arrow before and after the measurement).

Foam inlays for storing measuring instruments

As an optional accessory we offer customised foam inlays for storing instruments e.g. in drawer cabinets.

Let us know the external dimensions as well as the number and type of Kroeplin gauges to be accommodated. If you would like to integrate different manufacturers' products or tools together with Kroeplin gauges in one inlay, we can implement this based on your 2D CAD data.

Based on your data we will send an appropriate offer. Please contact us.

Definitions

Diagram of deviation

The individual diagram of deviation you can see in the certificate of quality which will be sent with every gauge.

Definitions

Terms of length test techniques see DIN 2257 part 1 and part 2 and International Vocabulary of Basic and General Terms in Metrology.

Foundations

This instruction follows approximately the checking instructions of the German standard DIN 878 for dial gauges and the checking instructions for caliper gauges according to VDI/VDE/DGQ 2618, page 13. The gauges are referred to as gauges with absolute measurement and adjustable zero point.

Measuring span Mes

The measuring span is the difference between starting value and final value of the measuring range.

Measuring range Meb

The measuring range of a gauge represents the range of measuring values in which given error limits must not be exceeded.

Range of indication Azb

The range of indication is the range between the highest and the lowest indication.

Numerical interval Zw

The numerical interval is the difference between two consecutive numbers of the last digit shown in the display. The numerical interval of a numerical scale is the modification of the value of a measured variable that causes the modification of the indication by one interval. The numerical interval corresponds to the scale interval of a line scale and is indicated in the unity of the measured variable.

Scale interval Skw

The scale interval is the modification of the value of a measured variable that causes the modification of the indication by one interval. The scale interval is indicated in the unity of the measured variable.

Deviation in the measuring range f_M

The deviation in the measuring range f_M represents the distance of ordinates between the highest and the lowest position in the deviation diagram, when the movable caliper arm closes. The **tolerance field G** for f_M is symmetrically positioned to the zero line.

Repeat precision f_w

The repeat precision f_w is a characteristic value for deviations of the measured quantity within the measuring range when the movable caliper arm closes (usually $n=5$). This margin of error is designated as **repeat limit r**.

Measuring force F_min, F_max

When the caliper arm closes, the measuring force F_{min} or F_{max} is determined at the top of the movable caliper arm. The gauge must be held in vertical position ≥ 200 mm.

Application area

- Mechanical engineering
- Automobile industry
- Aerospace industry
- Wire manufacturers
- Glass industry
- Dental laboratories
- Aerosol and packaging industry
- Foundries
- Foamed material industry
- Tube manufacturers
- Ceramic industry
- Medical institutes
- Special designs
