## Torque Wrench Loader

TW 1500
The design of the TW L1500 includes features that will provide an accurate and cost effective method for the calibration or testing of torque wrenches.
Designed to suit the majority of torque wrenches available with a torque value between 1 to $1500 \mathrm{~N} . \mathrm{m}$, the TW L1500 has been manufactured using quality materials that will provide many years of continuous, trouble-free operation.

The most significant feature of the TW L1500 is its compatibility with our wide range of

W ith Pro-Test Flange Mounted, Pro-Test and Smart Torque Block transducers.All fixtures, fastener kits and instructions are supplied allowing for complete flexibility and functionality.

TW L1500 Torque W rench Loader - Part No. 60246

Note 1: Min and Max torque wrench lengths are from the square drive to the centre of the handle. $N$ ote 2: Position 1 is closest to the loading carriage and position 3 is furthest away.

## Measurement and Calibration

ISO 1500

ISO 1500 fitted with Small Reaction Plate, Part N o. 20588.

## Torque Wrench Loader IS 1500 and 2700

These loaders allow torque wrenches to be calibrated or tested in accordance with ISO 6789:2003, BS EN 26789:2003 and American military standard GGG-W-686. Their function is to take full advantage of the accuracy of Norbar's torque measuring system by reducing operator induced variations in the calibration process.

- The high ratio, 1200:1 (ISO 2700,1250:1) gearbox allows high torques to be applied, whilst ensuring that the operator does not exceed the rate of increase of torque specified in the standards.
- The design allows for easy interchange of transducers using the N orbar Static Transducer system.
- The ISO 150090 facility allows performance of torque wrenches to be checked in two planes. M any wrenches give different torque values according to their orientation in use.
- Floating reaction point minimises side loads on wrench.
- ISO 2700 reaction extension bar allows w renches up to 2200 mm to be tested.This can be removed to save space.W renches up to 1100 mm can be tested when the extension bar is not fitted
- O ptional Small Reaction Plate (part no. 20588) allows torque wrenches down to 125 mm in length (centre of square to centre of handle) to be tested.
- Motorised version with speed control is available for the ISO 1500. This can be purchased as a kit to motorise an existing ISO or as a complete ISO 1500 Motorised Torque W rench Loader.

ISO 1500 and 2700 Torque W rench Loaders

| Part No. | Description | Range |  | TorqueWrench Length mm |  | Adaptors |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | N.m | Iofft | min | max |  |
| 60118 | ISO 1500 with 90 rotation | 1-1500 | 1-1100 | 200 | 1200 | 174, $312,12,3 / 4$ |
| 60193 | ISO 1500 Motorised Torque W rench Tester | 1-1500 | 1-1100 | 200 | 1200 | $114,3 / 2,12,3 / 4$ |
| 60194 | Kit to motorise an ISO 1500 | - | - | - | - | - |
| 20502 | ISO 2700 | 1-2700 | 1-2000 | 200 | 2250 | $14.4,3 / 12,3 / 4,1,11 / 2$ |
| 20588 | Small Reaction Plate | - | - | 125 | 180 | - |

Note: Min and Max torque wrench lengths are from the centre of the square drive to the centre of the handle.
